Learn More about Dentistry

Many people are unsure what procedure they need. If this is you, our page on [Common Cosmetic Dental Problems](#) [10] can help you understand your options for treating cracked, chipped, discolored, or otherwise unattractive smiles. We also help you understand [Why the Right Cosmetic Dentist Makes a Difference](#) [11], because the best cosmetic treatments not only look good, but function well, and are designed to last.

[TMJ](#) [12] is a common dental [12] problem that is widely misunderstood. Learn how dental problems can be caused by or contribute to misalignment of your temporomandibular joint (the jaw joint), which in turn can lead to headaches, neck aches, back aches, and a host of other problems. If you have headaches or facial, neck, or back pain that your doctor or chiropractor has been unable to fix, your jaw joint may be the source of your pain.

Your snoring may seem harmless, but it may also be the sign of sleep apnea, a serious condition that prevents you from getting the rest you need and may put you at an increased risk for high blood pressure,

heart attack, coronary artery disease, and stroke. It can cause you to gain weight or prevent you from losing it, despite diets and exercise. And sleep apnea can also lead to daytime sleepiness that can make it hard for you to focus, cause personality changes, and put you at an elevated risk of car accidents. Learn about the [causes of sleep apnea](#) [13] as well as treatment options provided by our Columbus area **dentist**.
